

Novathreads PDO Life Pre-Treatment Considerations

- Arrive 30 minutes prior to your scheduled procedure for topical numbing and pre-treatment photos.

- It is possible, though extremely unusual, to experience a bleeding episode during or after the procedure. Should bleeding occur, it may require treatment to drain accumulated blood (Hematoma). Do not take any aspirin or anti-inflammatory medications (Advil, Motrin, Ibuprofens) for ten (10) days before surgery, as this may contribute to a greater risk of bleeding. *

- Consult your physician if your currently anti-coagulants prior to your procedure.

- Products Recommended to Complete and Optimal Skin Regiment:
 - *SkinMedica Facial Cleanser*
 - *TNS Recovery Complex*
 - *Essential Defense SPF35 Post Treatment Sunscreen*
 - *Ultrasheer Moisturizer or TNS Ceramide Treatment Cream*
